NutriPnea

A major scientific breakthrough for sleep apnoea

Nutrilab

SLEEP APNOEA

Key facts and figures

- 30,5% of people over the age of 65, 19,7% of 45-64 year olds, and 7,9% of 20-44 year olds, are affected
- Pauses in breathing of 10-30 seconds take place at least five times per hour of sleep
- 3.25 million people wear a mask at night
- 30% refuse or cannot stand wearing a mask

Diminished quality of life

Impact

- Snoring
- Chronic fatigue
- Daytime sleepiness
- Cardiovascular disorders
- Premature death

Risk factors

- Age
- Being overweight
- Family history of sleep apnoea
- Anatomical factors (jaw, tongue, etc)

SLEEP APNOEA

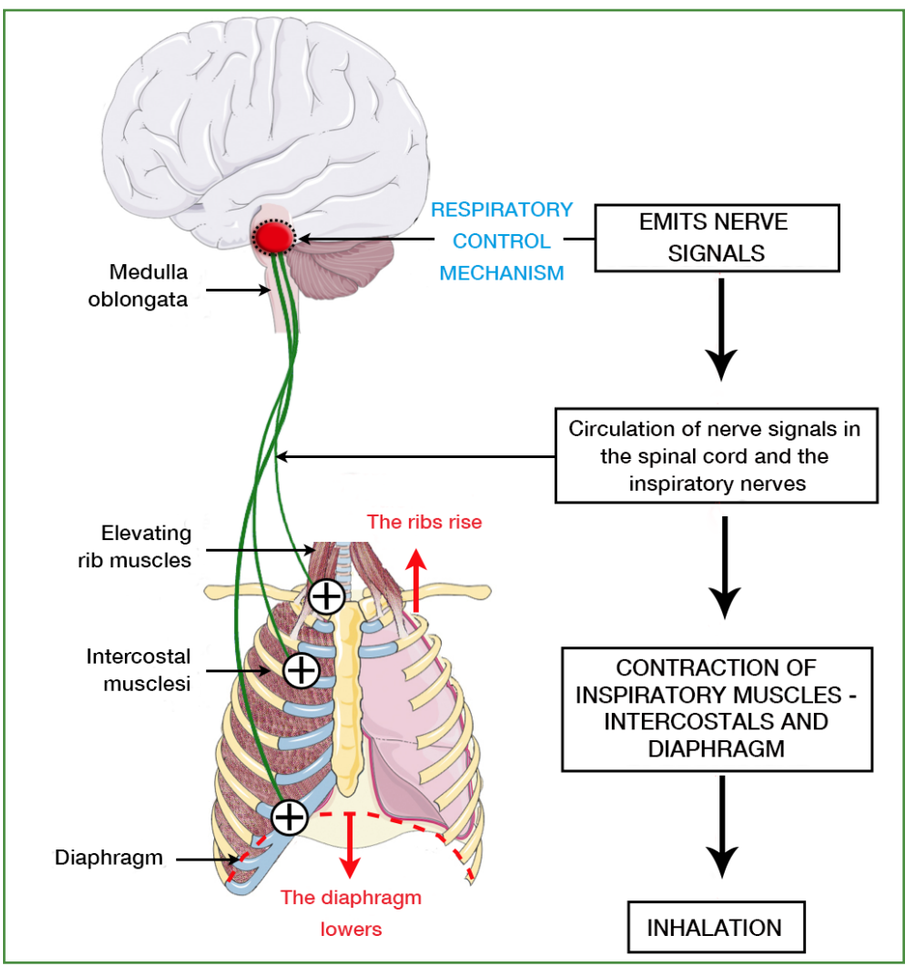

Disruption of three physiological functions

1. Bulbar cardio-respiratory centre
2. Swallowing - speech
3. Respiration / Expiration

1. BULBAR CARDIO-RESPIRATORY CENTRE:

Respiratory apparatus command disturbed

➡ Central apnoea

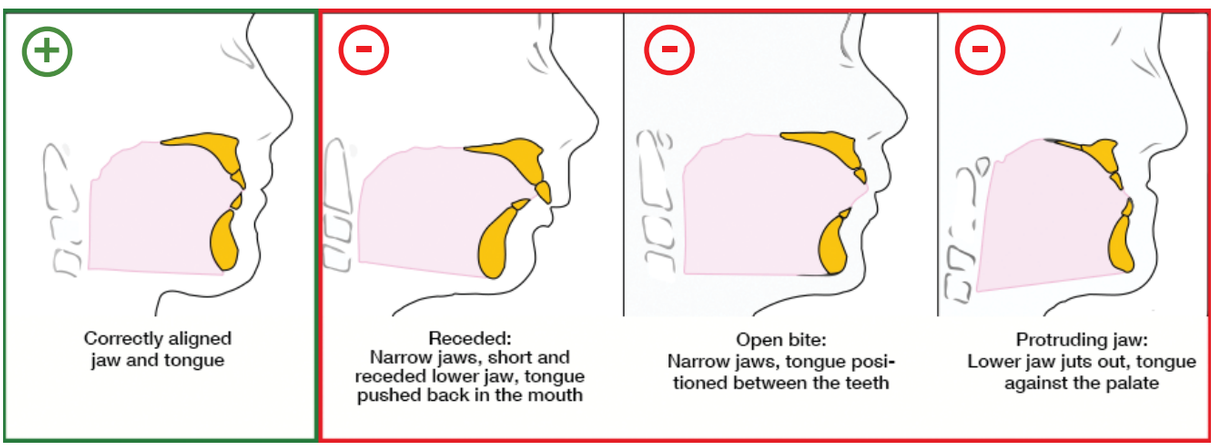

A disrupted command centre leads to poor communication when the command centre communicates with the associated functions

SLEEP APNOEA

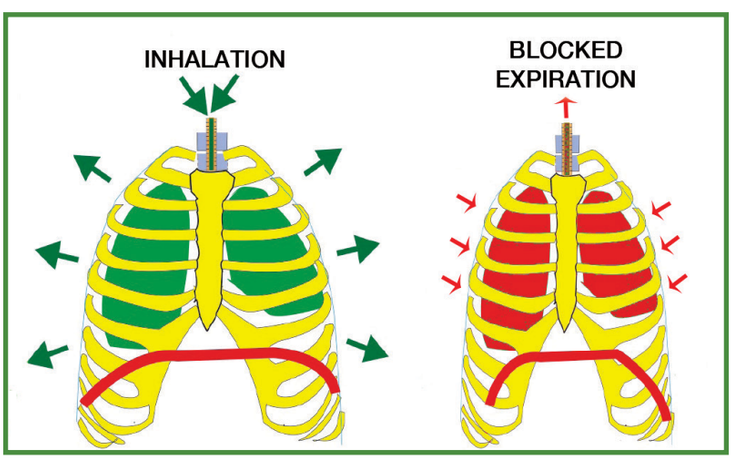

2. SWALLOWING - PHONATION:
Palate muscles and nasal breathing disturbed
➡ Obstructive apnoea

Impaired swallowing:

- Caused by the jaw being misaligned
- Involves an obstruction

3. RESPIRATION /EXPIRATION unbalanced:
➡ Obstructive apnoea

Impaired respiration leads to expiration being blocked

SLEEP APNOEA

Limited and invasive treatments are available

- Mechanical aids:

CONTINUOUS POSITIVE AIRWAY PRESSURE
This is the standard treatment for sleep apnoea. It involves the patient **wearing a mask** connected to a beside machine which runs all night

ORAL APPLIANCE
A removable custom-made mouthpiece that is worn at night

- Surgery

Surgical procedures are used to treat major anatomical anomalies

Serious related complications

- Cardiovascular disorders
- Endothelial dysfunction
- Risk of cancer
- Abnormally high death rate

At the present time, there are no definitive solutions for SLEEP APNOEA

A major scientific breakthrough: Trace metals to treat SLEEP APNOEA

Trace metal deficiency

Malfunctioning respiratory system
physiological functions

A complex of trace metals specially formulated to address these specific imbalances

Maintain, regulate and optimize physiological conditions

A major scientific breakthrough

Nutri Pnea

Clinically tested solution

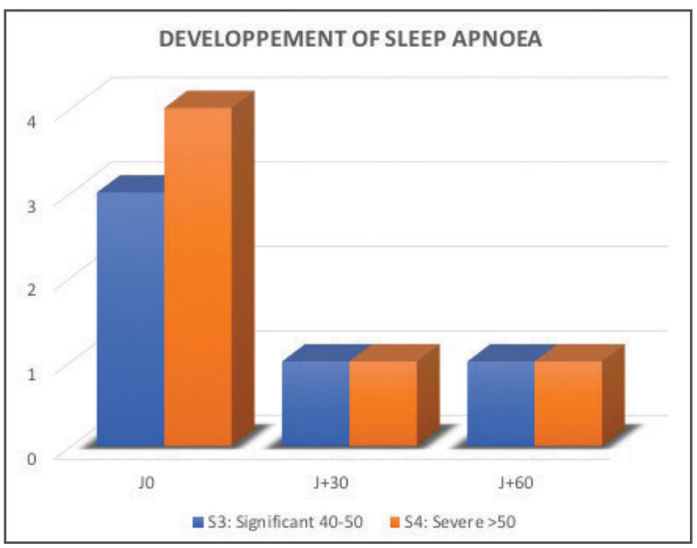

NUTRI PNEA was tested over 60 days

⇨ 90% improvement for severe cases

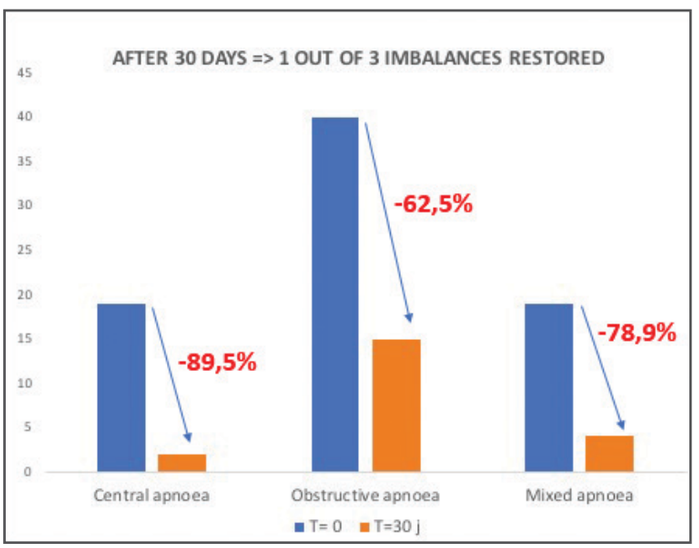

⇨ 60% improvement for routine cases

PROTOCOL USED:

The research was conducted by the Centre de Recherche et de Documentation de Donzère on 189 volunteers presenting sleep apnoea for over three months. The volunteers did not present any psychiatric symptoms and were not taking any treatments, antidepressants or antipsychotic drugs, dental orthotic, nor any positive pressure, that could have influenced the findings of the study.

REDUCED POLYSOMNOGRAPHY SCORES
90% improvement for severe cases
60% improvement for routine cases
S3:significant 40-50
S4:severe >50

REDUCTION OF THE NUMBER OF APNOEA
89,5% improvement for central apnoea
62.5% improvement for obstructive apnoea
78.9% improvement for mixed apnoe

Nutri Pnea

The targeted solution for men and women

✓ Clinically proven results:
- ⇨ 90% improvement for severe cases
- ⇨ 60% improvement for routine cases

100% natural

✓ No contraindications

✓ Suitable for everyone - men, women and children - whatever the severity of the sleep apnoea , including people who are already fitted with devices

✓ Biocompatible and bioavailablee

✓ The formulae are the result of Nutripuncture® research

3 sequences of 10 tablets to be chewed every day

No side effects

Non-addictive

An eagerly awaited treatment

Nutri Pnea
Practical information

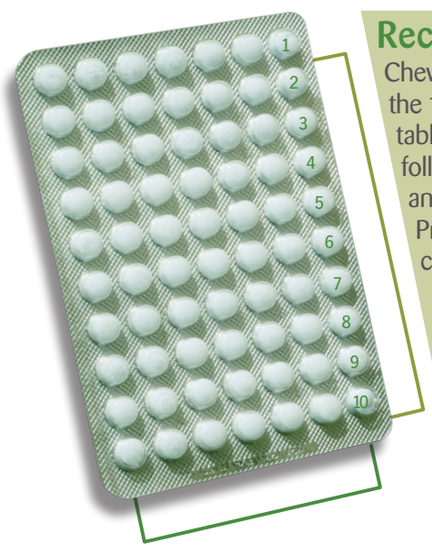

Composition

Nutri Pnea

Trace metals: Calcium carbonate, Calcium chloride, Copper carbonate, Copper gluconate, Copper sulphate, Dicalcium phosphate, Ferric citrate, Ferrous sulphate, Iron gluconate, Magnesium carbonate, Magnesium chloride, Magnesium sulphate, Manganese carbonate, Manganese gluconate, Manganese sulphate, Potassium gluconate, Sodium carbonate, Sodium chloride, Sodium iodide, Tricalcium phosphate, Tri-magnesium phosphate, Zinc acetate, Zinc gluconate, Zinc sulphate.
Other ingredients: Lactose (excipient), Sorbitol (sweetener), Magnesium stearate (anti-caking agent). Contains sweetener.

Recommendations for use

Recommendations for use:

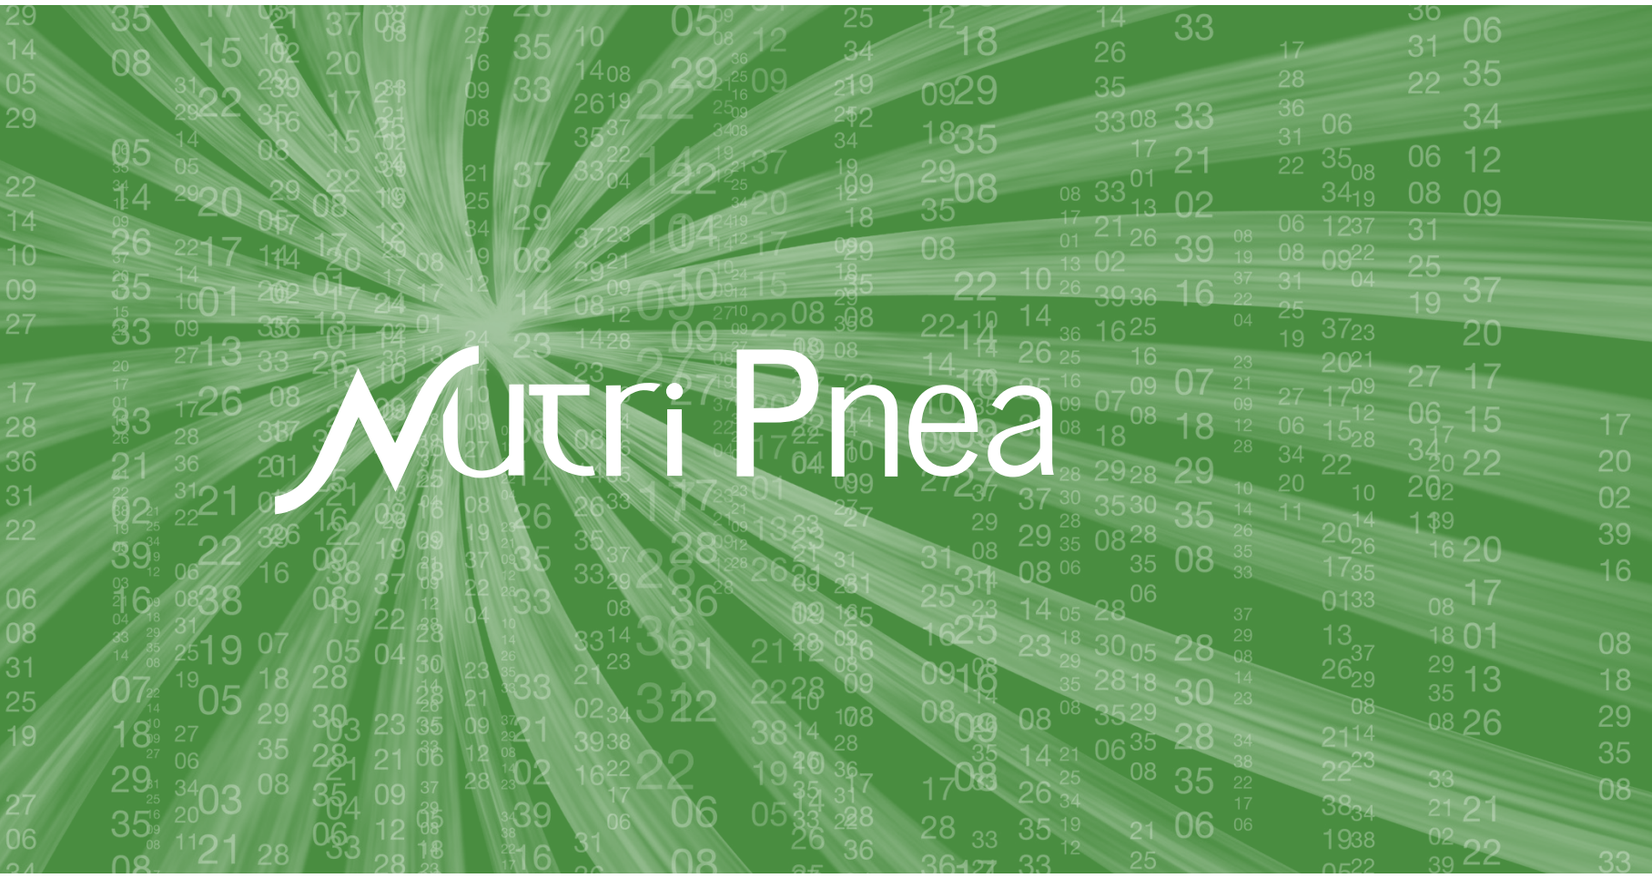

Chew and swallow one after the other (without combining them) the 10 tablets in the right order, starting with the first **Nutri Pnea 1** tablet and finishing with the 10th tablet, followed by the 10 **Nutri Pnea 2** tablets, and finally the 10 **Nutri Pnea** 3 tablets.
Preferably in the evening before going to bed. The tablets do not cause tooth decay.

Seven-day course of treatment contained in each blister pack.
The box contains 28 doses of each series (3x280 tablets) i.e. a 28-day course of treatment.
Recommended treatment period: one month.
Repeat for two months to further increase the beneficial effect of the supplements.

✓ 90 % improvement for severe cases
in only two months*

✓ Consolidate the effect and prevent a relapse
by taking the tablets for two further months
